A household user living in an apartment is trying to track and reduce monthly electricity consumption, but at home when they receive the bill they don't know which appliance uses the most power because the bill only shows total units, which makes them feel frustrated and worried.

WHO?

A house hold user living in an apartment

WHAT?

Replace with the top voted challenge

Is trying to track and reduce their monthly electricity consumption

WHERE/ WHEN?

Replace with the top voted context

At home, when they receive the monthly electricity bill

WHY?

Replace with the top voted value for the customer

Customer value/benefit

Because the electricity bill only shows total units used, not appliance-wise usage. So they don't know which device like AC, Fridge, or Geyser consumes the most power

Replace with the top voted value for the business

Business value/benefit

The user feels frustrated, worried, and helpless because they cannot identify the main cause of high electricity bills
